The local NHS has launched its spring COVID-19 vaccination programme and we've made it as convenient as possible for people in Rutland to get vaccinated.

Our Roving Vaccination Unit is visiting a range of locations across the county in April and May, giving local people the opportunity to walk in and get vaccinated, no appointment needed.

The spring vaccination offer aims to deliver enhanced protection to those considered most at risk from the COVID-19 virus. The eligible groups include adults aged 75 and over, residents in older adult care homes, and individuals aged six months and over, who have weakened immune systems. Vaccinations are safe, quick, and easy and offer the best possible protection against viruses.

In addition to COVID-19, the Roving Vaccination Unit is carrying a wide range of other vaccines, such as HPV, MMR, RSV, MenACWY (meningitis), pertussis (whooping cough).

No need to book an appointment for the Roving Vaccination Unit – just turn up!

Other ways to get a vaccination in Leicester, Leicestershire and Rutland

Visit the NHS.uk website or by calling 119.

Book by calling the local booking service: 0116 4975700.
